EMBODIED AI PLATFORM

RealStudio

One platform from robot control to on-site deployment.

Robot control, teleoperation, data collection, annotation & cleaning, VLA and RL post-training, motion recording, and multi-robot monitoring & remote teleoperation.

01 Control → 02 Collect → 03 Train → 04 Deploy

Choose your edition

Data, Training and Deployment each include Free

Free

01 · Control

Control and teleoperate your robots.

- ✓ **Robot control**
- ✓ **Teleoperation**

Data

02 · Collect

Collect and manage robot data.

- ✓ **Teleoperation with data collection**
- ✓ **Data management platform**

Training

03 · Train

Post-train VLA and RL policies.

- ✓ **Data annotation & cleaning**
- ✓ **VLA post-training**
  π0.5 · Isaac GR00T N1.7
- ✓ **RL locomotion training**
  Humanoid & quadruped robots

Deployment

04 · Deploy

Run multiple robots on site.

- ✓ **Multi-robot monitoring & teleoperation**
  Many-to-many over LAN
- ✓ **Runtime SDK**
  Let policies control robots directly
- ✓ **Motion recorder**
  Pre-record actions, pick and run them at runtime

Enterprise

Every capability in a single edition.

Free + Data + Training + Deployment
